BHUMI BHATT

Backend Engineer | Full-Stack Developer

Delhi, India | bhumibhatt.work@gmail.com | +91 88823 79221 | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 1.5+ years of experience designing and shipping scalable microservices, REST APIs, and distributed payment systems using Java, Spring Boot, and Node.js. Strong foundation in system design and data structures & algorithms (5-Star Java on HackerRank, 250+ problems solved). Proven record of optimizing backend performance, reducing manual effort through automation, and delivering production-ready, end-to-end solutions.

TECHNICAL SKILLS

Languages: Java, C++, JavaScript (ES6+), SQL
Backend & Systems: Spring Boot, Microservices, REST APIs, Node.js, Express.js, Kafka, Redis, System Design
Databases: MySQL, MongoDB, AWS Timestream
Frontend: React.js, HTML5, CSS3, Bootstrap
DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, Jenkins, Git, CI/CD
Testing & Tools: JUnit, Mockito, Postman, Selenium, Playwright

EXPERIENCE

Backend & Automation Engineer | Primathon *Jul 2025 – Present*

- Engineered custom admin APIs and backend syncing automation across **7 merchant systems**, streamlining data flow and improving system reliability.
- Reduced manual operational effort by **70%** by building automated backend workflows for analytics and meta-event processing.
- Integrated AWS Timestream, S3, and Lambda into backend pipelines to enable real-time data ingestion and scalable event handling.

Software Engineer Intern | Paytm *Jul 2024 – Feb 2025*

- Developed and optimized microservices managing the QR-code lifecycle for multiple merchants, powering real-time transaction notifications.
- Improved backend service reliability and performance by **67%** through modern microservice architecture and optimized processing.

Software Engineer Intern | CodeAlpha *2023 – 2024*

- Built order and payment microservices with REST APIs and MySQL, containerized using Docker for scalable, production-ready deployment.
- Optimized 30+ REST API endpoints and automated build pipelines with Git Actions, improving response times and delivery consistency.

PROJECTS

Distributed Payment Gateway *Java, Spring Boot, Microservices, System Design, AI*

- Architected a production-ready distributed payment gateway with **30 REST APIs** across four services — Order, Payment, Merchant, and Vault.
- Applied system design principles for scalability and fault tolerance, delivering optimized, high-performance backend services. *(Certified project)*
- Integrated AI-driven daily alerts to surface transaction insights and monitor system health automatically.

SABRE Travel — Modern Migration *Java, Spring, XML, Apache FreeMarker*

- Migrated a legacy mainframe travel solution to a modern Java/Spring stack, re-implementing core backend modules with XML and FreeMarker templating.

EDUCATION

B.Tech in Computer Science | Guru Gobind Singh Indraprastha University *2021 – 2025*

- **CGPA: 9.3 / 10** | Research Paper: Generative AI Applications in Personalized Systems

CERTIFICATIONS & ACHIEVEMENTS

- HackerRank — 5-Star Gold in Java (Certified); solved 250+ Data Structures & Algorithms problems.
- Spring Boot Advanced Certification — Coding Shuttle; built 4 real-world projects (Lovable, LinkedIn, Airbnb, and a System Design project).
- AWS Certified Developer – Associate | Harvard CS50: Databases with SQL | ScholarHat: Data Structures & Algorithms.
